S C H W U N G

Schwung is a lighting concept, connecting aesthetic and quality through matter. An exploration of history, forms and function, elegantly fulfilling an essential need of modern life, capturing light. Our pieces play with architecture or create spaces of their own. Founded by Dominique Sente (Belgium) and Rudi Nijssen (Netherlands). What began as a curiosity for objects, a venture in collecting, curating and trading antiques—became a passion to create original designs.

Developing lighting fixtures through simple and timeless materials, sustainably; we are committed to creating quality products that last. Beginning with the design we are constantly refining aesthetic and function. Both in the lamps themselves and throughout the manufacturing process we pursue a holistic approach to efficiency, and the reduction of environmental impact.

The Odyssey Collection

Machines frozen in motion, the Odyssey collection captures eventful journeys seen through a futurist lens.

Available in three finishes (natural brass, polished nickel and gunmetal) solid brass rods create an open axis for structure, bisected by elegant arched cylinders. Neo-classical globes are arranged in even rows and honeycombs, rendered in ephemeral opaque or frosted glass.

Environmental light casted from another space. While in use, clouded glass diffuses points of light giving a pleasant glow. While off, delicate curves reflect bold straight lines- the iconic architecture of past and future.
